

UK Systems Society  
International Conference  
2026

University of Portsmouth Business School, UK  
17th September 2026

**Systems Thinking and Practice in the 21<sup>st</sup> C- Addressing the Challenges  
of the Digital Age**

*As Technologies develop, how can we be sure that the resulting socio-techno systems that emerge support, not just the workplace, but the wider society, too?*

We welcome practitioners, scholarly papers and case studies which provide examples of the interdisciplinary nature of digital systems design and development in practice. We encourage the choice of topic showcases and demonstrations that use 'systems' ideas in an area of concern.

Examples include:

- Education systems
- Medical systems
- Legal systems
- Health systems
- Environment systems
- Business in an uncertain environment
- Systems research (e.g., the social impact of AI)
- Design – systems methodologies and the digital 'systems.

This year's UKSS International Conference is FREE to paid-up Members of the Society.

More Conference details to follow via <https://www.systemsforum.org/>
